

SIMFISH SPORT FISHING SIMULATOR

This simulator permits the use of a wide range of tackle, simulating fish from small Trout up to Tuna of 60 kg.

The **Simfish** is an essential tool for fishing shops, schools, fishing clubs, recreational centers as well as an exercise and training tool for anglers

Video

Submarine footage showing the fish during the fight (hooked). This footage is synchronized with the fight. The "catch and release" policy is advocated with footage encouraging such practice.

5 Fish species are included (to select – see the list below)

During starting procedure, the user will activate the machine by selecting his 5 fish choice. It will be possible to purchase additional fish, directly through Jigstar Africa.

Option: Remote control

List of the fish available: Video

River:
